

Air and Courier.

BY BOUTELLE BROTHERS.

All business letters should be addressed to "Boutelle Brothers, and communications intended for the publisher should be addressed to "Editor of the Air and Courier."

MONDAY, APRIL 10, 1893.

The Boston Herald announces that all the important foreign news has already been filled with Democrats. As Cleveland has only been in office himself a little more than four weeks, it will be seen that he has lost no time in taking care of his friends, regardless of his reform pretensions.

If Secretary Greeham is reading the list of names he will see that the many editors in an uncomfortable position. He is to be commended for any intention to protect the rights of American subjects, but heretofore these editors have had a good deal to say about jingoism and an attempt to bully a little fellow, as was the case when we had our trouble with Cuba.

The original treaty made by William Penn with the Indians will be shown in the Pennsylvania State building in the World's Columbian Exposition. The treaty bears the signature of Penn in his handwriting and the signatures made by the Indians in hieroglyphics. The celebration of the treaty will also be placed on exhibition in this room. The old liberty bell will be placed on a hand, some raised platform, surrounded by a gilt railing, in the center of the rotunda of the State building. The platform will be built on rollers so that the bell may be rolled out of the building in less than three minutes in case of fire.

A. C. Conger, of Akron, O., who is largely interested in the manufacture of glass, agricultural implements, tin plate and some other things, has been in Washington two or three days for the purpose of finding out as near as possible what changes may be expected in the tariff on these articles in order that he may shape his business accordingly. He called on Secretary Gresham, ex-Chief of the Sprague and a number of the other Democratic leaders in order to ascertain their views as to what was likely to be done. Mr. Conger said that after a thorough investigation he was satisfied that the Democrats would make a very radical cut in the duty on tin plate, probably sufficient to restore the lost trade of Great Britain in that article.

The special election in Portland will take place one week from today. Mayor Ingraham made a pretense of being disgusted with the tactics of his party in allowing to steal control of the city, and declared that he would have nothing more to do with the "dirty business," but he is in the field again, begging for votes and posing in the role of injured innocence. There was a disposition to place Mayor Ingraham on a pedestal as a living evidence of the political honesty of at least one Democrat, but the simple fact is that he had declined the election until it was certain that one of the conspirators had determined to tell the whole story. In view of the history of this foul plot, the people of Portland ought to return a very emphatic protest against the city stealers. It will be a lasting disgrace to that city if Mr. Baxter fails to be elected next Monday.

The best thing for the Southern States would have been the establishment of their independence as a Nation. Their connection with the Northern States cost them many millions of dollars annually, and brings them no compensatory benefit whatever. They sought to establish their independence for that reason, and desire to withdraw from the old Union peacefully. No one on the outside forced a "conflict" between the sections, or desired a conflict. The war was waged on the part of the Northern section to retain a rich taxing district under the same general government.

The above paragraph from the Charleston News and Courier calls forth the following well merited reply from the New York Herald, dated April 10, 1893. The impulse of the seceding traitor is behind the lying declaration of the Charleston News and Courier. The election of Cleveland and consequent political rehabilitation of the Unionists has filled the Southern press with a course of calumny. "The truth is coming out. The true significance of Cleveland's triumph is seen in the declaration that the "Lost Cause" is not long in the insolent declaration that the war on the part of the North was not a war for the Union but was a base and mercenary conquest. The harvest promises to be a rich one.

The James S. Ewing, of Illinois, who is named as Minister to Belgium is, of course, a member of the extensive Ewing family which is related by marriage to Vice-President Adlai Stevenson. He was Adlai's law partner for years. He is the proud citizen who stood up at a banquet given in Nashville to Stevenson last November and vouching for his cousin said: "I would say that he is not dishonorable or thought has not ever returned the compliment of that man that has not been loyal to the South."

Reporting this incident the Nashville American said at the time:

When this declaration fell upon the ears of the banqueters they sprang to their feet and cheered and yelled, and the air was filled with waving handkerchiefs and napkins. It was some moments before quiet was restored. It was distinctly the hit of the evening. Mr. Ewing's cousin was visibly affected, and he sat for some time with his face buried in the palm of his hand.

Of course both Stevenson and Ewing were loyal to the South before the War, during the War and since. It is quite appropriate for Mr. Cleveland to look after the comfort of Judge Ewing.

Congressman-elect C. H. Grosvenor, of Athens, O., in conversation on the election in the Buckeye State said: "We feel very well pleased over the result of the Spring elections and I have no doubt that Ohio will take her place in the Republican column next November. Though there has been a good deal said about a change of political sentiment in Ohio, I do not think there is any such change that need concern Republicans living in the State very seriously. At the last Presidential election we lost a number of votes in the Eastern district of the State bordering on Pennsylvania, among the associated labor organizations in the iron and coal industries, acting in sympathy with the Home-State impulse. That was, however, a sudden impulse and we will get back this vote this fall. And there is back this no United States Senator to be elected at the ensuing election, I believe the contest will be the hottest ever fought in Ohio. Mr. McKinley will, of course, be nominated, and it will be a test battle on the question of protection or tariff reform. The election will indicate the drift of sentiment and will be of decided interest in this respect alone. It is a singular coincidence that the Republicans of Ohio, when a Republican President has been elected, have lost the State to the Democrats at the next yearly State election in every instance since the war, except the year following the election of Mr. Garfield. At that time he was trying sick and the Democrats did not vote with any exception. There are about 300,000 Republicans in Ohio, and the normal Republican majority is about 30,000. With a 400,000 election

preludes in the State it will be seen that the change of a vote or two in each precinct counts a very important figure, but I have no apprehension as to the success of the Republicans."

Reform With a String to It.

Secretary Herbert announces his purpose to adhere to the rules established by his predecessor for filling places in many various. This is hard for the sportsmen, but it is in the interest of the public service. Boston Journal.

One Boston brother should not swallow goose-food to eagerly. It is always safe to allow at least thirty days' margin on such reform propositions at the outset. The above-quoted assurance has been repeated in various forms and lavishly commended, but now comes the Washington News, which aspires to the official organ ship, saying:

Secretary Herbert has been "appealed" to by Senators, Representatives and others to throw all the yards open to employment, regardless of the Civil Service provisions. But he has steadfastly refused to do so. He says Gen. Tracy's order will remain in effect so long as it is honestly and fairly carried out.

That, say the News, "there is a movement on foot looking to the exposure of the civil service boards" in the navy yards, on a charge of partiality to Republicans, and it is probable "that Secretary Herbert will find an investigation necessary."

If the Journal will search the "investigations" and their results it will doubtless find out considerable about Democratic civil service reform.

No one on the outside forced a "conflict" between the sections, or desired a conflict. The war was waged on the part of the Northern section to retain a rich taxing district under the same general government.

The above paragraph from the Charleston News and Courier calls forth the following well merited reply from the New York Herald, dated April 10, 1893. The impulse of the seceding traitor is behind the lying declaration of the Charleston News and Courier. The election

DR. BUCHHEIM & CO.

Mr. Frederick Sutherland

has returned from a short trip up river.

Mr. Daniel McLeod, of the Maine State College at Orono, spent Sunday at his home in this city.

Contractor A. A. Kenney has been having some repairs and improvements made on the front of his shop on Penobscot street.

Mr. Benjamin Kingsbury, who has been appointed postmaster at South Brewer, instead of Mr. Daniel Kingsbury, as was, by error, stated Saturday.

Mr. John Wallace, of St. John, N. B., and his daughter, Miss Mae Wallace, are visiting with Mr. and Mrs. J. A. Wallace at their residence on Holyoke street.

The death of Mrs. Orilla B. Lowell, the widow of the late Mr. B. B. Lowell, formerly of Orlington, occurred last Wednesday, at Hyde Park, Mass. She was sixty-four years of age.

A meeting of the First Congregational P. S. C. held last evening, the semi-annual reports of officers were presented. They were of an encouraging nature and showed good work done.

The P. S. C. League, of the First M. F. church, holds a business meeting this evening for the purpose of choosing officers and committees for the ensuing year, and to transact any other business which may come up.

Mr. Bert I. Berry, who injured his knee about a week ago and has been obliged to absent himself from his work, since as a consequence has about recovered and expects to resume his duties as clerk for Messrs. Harlow Bros. to-day.

The private dancing party, which has been arranged by the water club, which has been held through the winter, occurs in City Hall this evening, and is expected to be a very pleasant event. Preparations have been made for the enjoyment of all who attend.

A large proportion of the men from this city, who have been up river during the winter, working in the woods operations, have arrived home. Some of them will remain and work in the mills during the summer, but others will return up river later, to be employed on the river.

Mr. George Gerry goes to Old Town the first of this week to make his final arrangements in regard to establishing his store in the jewelry business there. He intends to go into the store occupied by Mr. C. A. Dillingham there and will have the good wishes of all his friends here for success in his enterprise.

To-day Messrs. Gould & Hastings, of Bangor, who operate the D. & H. mill, intend to put a crew of men to work making the usual spring repairs and preparations starting sawing at the mill after the ice leaves the river. This firm has a large stock of logs on hand with which to begin sawing and will be among the first to start this spring.

Scout's Agent A. H. H. succeeded in removing the difficulty with the water pipe leading into the High School building, it having been found since some time in the winter and all water that has been used in the structure has been earned by the painful. The supply has been turned on again and the interior and all concerned are all pleased.

Sunday pleasure riding for the season of the electric cars has commenced. It was to be plainly seen yesterday afternoon when the vehicles although they were closed ones, were crowded the most of the time. When the open cars are put on, after the weather grows warmer the pleasure riding of former summers will probably be duplicated.

The printer is getting along well with the city reports and will probably get his part of the work finished by the latter part of the week. Then the book will have to go to the binders and will probably be ready for issuing to citizens some time next week. The date when they will be out will be rather earlier than has been usual since the inauguration of the city form of government.

A knife which its owner has for years of losing is one which find further care keeps on his desk in the City Hall building. Of course he has more or less use for such an article but to leave it in a place where a stranger frequently can get at it is a little risky. It seems rather queer that it is explained that although the blade was broken it has been kept in the building and was once a nice one. It has seen its best days, and now has been broken. Its immunity from surreptitious appropriation is a standing joke among the city officials who, however have occasion to envy the better justice the possession of another and better knife which he is careful to carry in his pocket.

At the last meeting of the City Council, the retiring Supervisor of Schools, P. A. Floyd Esq., made a suggestion that he be considered a very good one. He said that the grounds about the school buildings should be properly graded on account of the foundations of the structures, some of which are being damaged owing to water, and of course the appearance of the grounds would be greatly improved by so doing. He also recommended that concrete walks be made from the sidewalks to at least one entrance of the buildings as in wet weather the pupils sometimes have to wade through three or four inches of mud to get to their rooms. These suggestions will doubtless be carried out, sooner or later.

Supervisor of Schools Curtis will probably make a change in the geographical used in the city schools before the next fall term. The contract of five years for those at present in use expires in the summer and he deems it expedient for several reasons to make a change. One account of changes that are constantly occurring new additions of geographical maps issued each year, and as a consequence there are variances in the statements made by the text books now in the schools, which make confusion. For example the population of a given city in 1890 might have been 10,000, and would be given by the edition of the geography of that year. In 1892, however, it might have increased to 15,000, and of course would be so stated in the year's edition. As new books have necessarily been purchased from time to time, the confusion that different statements in the above regard, and others also, makes it obvious. A change of books would do away with this trouble and Supervisor Curtis also considers another book which he has in mind, as being superior to the one now in the schools, so it is quite probable that it will be substituted at the beginning of the fall term.
